District, Wuhan, Hubei, China

Wuhan Qisitong Import & Export Co., Ltd. started its activity in 2009 with a powerful, dynamic and talented team who concentrated on R&D and manufacture traffic safety facilities in the field of road safety and intelligent traffic management for roads, motorways and urban networks.

Our factory covers an area of 30,000m², it contains traffic sign workshop, rotational molding barrier workshop and thermoplastic road marking paint workshop, one office building and one research and development building. All products have been widely applied to domestic projects for years.

Our mainly products are:

- Intelligent Led Self Illuminated traffic Sign
- Rotational Moulding Plastic Barrier
- Intelligent pedestrian crossing guard system
- Led Solar Power Flashing Delineator Tube
- Thermoplastic Road Marking Paint
- Intelligent parking locator

Market-oriented, survive by quality, and develop by credit, Hubei Qisitong Import & Export Trading Co., Ltd. provides overall solutions and first-class products and services to the global public security, transportation, safe city and smart city industries. We warmly welcome world-wide Buyers, contractors, builders, manufacturers, traders, peers and related parties visit our company for detailed discussion and cooperation.

Rotational Moulding Water Filled Barrier

Material: Fresh new PE

Size: 42" tall x 72" long x 24" wide at base, narrowing to 10" wide at the top

Color: red, yellow, white or customized

Water capacity: 200kg / 440lb

Weight: 9kg/20lb.

ADVANTAGE

1.Safety.

Made of imported PE, our barriers are quite eye catching. Color can be customized according to different road standards. After water loaded, those barriers are more flexible and can effectively reduce the impact force when accident happens.

2.Portable

Plastic barriers are designed for temporary road use. Compared with cement barrier, it can save the cost of transport and manpower.

Applies to any road condition and will not do harm to the road surface. Need no installation.

3.High quality

Compared with blow molding barriers and injection molding barriers, rotational moulding barriers are more tough and durable. Will not easily broken and quite color stable, rotational molding is the best way to make a good barrier.

Technical Requirements

1. One-time molding, strong impact resistance, more resilient after loading water;
2. Reflective sheeting can be applied so as to effectively enhance the night warning effect;
3. The barrier is bright color, not easy to aging, and will not fade in three years;
4. Material's ability to resist impact load $\geq 18\text{kJ/cm}^2$, tensile capacity $\geq 16.44\text{mpa}$,
5. Will not change or reduce its physical performance at -35°C to 120°C ,
6. With its inter-link system that barriers can be connected to each other and form a line.

Rotational Molding High Water Filled Fence

Material: Fresh new PE

Size: 63" tall x 59" long x 17" wide at base, narrowing to 5" wide at the top

Color: red, yellow or as your request

Water capacity: 250kg / 550lb

Weight: 21.5kg / 47lb
